Dear Mr Clark,

EMJC Earthmoving and Plant Hire Pty Ltd
("The Company")
3 Central Avenue, Hazelmere, WA 6055

We thank you for your instructions to value the subject assets. Our detailed report and valuation follows.

The assessed assets stated are subject to the matters set out in the letter and the limiting conditions outlined within the body of this report.

Client Instruction

In accordance with the email instruction, dated 26 March 2024, we have been asked to prepare an inventory and valuation of the subject assets on the bases of Market Value and Orderly Liquidation Value. We draw your attention to the definitions of these methodologies in Annexure A.

Inherent Scope Limitation

Please note that we have not sighted any of the assets included in this report. As such please note:

- We do not confirm the existence of any of the assets included in this report and make no representations or comments as to the condition of same.
- In arriving at our estimates of value we have assumed that all assets are in good working condition considering their age and normal use and have been maintained in line with standard manufacturer and safety compliance requirements.
- We have relied on emailed information as provided by you.
- In the event that any of the information that we have relied upon is inaccurate our estimates of value and the comments in this report will need to be reviewed.

In view of the above comments the estimates ascribed to the assets in this report should be considered indicative only. Grays accept no liability for reliance placed on assets appraised on a sight unseen basis given the inherent scope limitations outlined. We recommend that any party relying on this report consider this inherent uncertainty and satisfy themselves as to the condition and existence of the assets.

Purpose & Intended Use	This report has been prepared under instructions from Ron Clarke of EMJC Earthmoving and Plant Hire Pty Ltd for accounting purposes. This valuation should not be used for any other purpose. If it is used for any other purpose, then Grays will need to be contacted and the values and comments in this report may need to be revised to reflect the amended purpose.
Scope of Work	As per the email instruction dated 26 March 2024, Grays will undertake an unsighted desktop appraisal of Assorted Earthmoving, Transport and Ancillary Assets from information supplied. Grays valuer will appraise this information and apply an estimated opinion of value. The data collected and ascribed value will be presented in a formal valuation report.
Premise of Value	It is our belief that the requested bases of value are appropriate for the given Scope of Work and desired outcome.
Nature of Business and Condition of the Asset	The company operates a large fleet of earthmoving and transport machinery with its own maintenance and workshop facilities across Western Australia
Currency & GST	All values stated within this report are in Australian Dollars (AUD) and Exclusive of Goods and Services Tax ('GST').
Effective Date of Valuation	10 April 2024 The values detailed herein are current as at the Effective Date of Valuation only. Changes in foreign exchange rates, economic conditions or market forces may have the effect of significantly and unexpectedly changing the values which have been assessed, over a relatively short period of time (which may require the valuation to be revised). No liability is accepted by Grays in respect of any loss or damage which may arise from any change in values caused by such circumstances. Without limiting the generality of the above provision, no responsibility or liability is accepted by Grays in circumstances where this Valuation or any part of it is relied upon after the expiry of 90 Days, from the effective date of this report. *(Please see Other Special Commentary)*
Highest and Best Use	The highest and best use of an asset is defined as "The most probable and legal use of a personal property which is physically possible, appropriately supported and financially feasible and results in the highest achievable value in the appropriate marketplace. The appropriate marketplace must be consistent with the concept of value". We have considered the subject assets from their highest and best use perspective unless otherwise stated.
Valuation Approach	In assessing the value of the assets at their highest and best use we have considered the three industry accepted approaches to value being the Income Approach, Cost Approach and Market Approach which are defined as follows;

CONFIDENTIAL
gkarran@valicorp.com
IP: 101.184.146.43
2025-10-22 03:12 UTC

a) **Income Approach – (Cash Flow Analysis Method)**
This approach considers value in relation to the present worth of future benefits derived from ownership and is usually measured through the capitalisation of a specific level of income. The appraiser determines the present value of the future economic benefits of owning the property.
(American Society of Appraisers)

b) **Cost Approach – (Depreciated Replacement Cost Method)**
The Cost Approach is based on the principle of substitution; a prudent buyer will not pay more for a property than the cost of acquiring a substitute property of equivalent utility. The appraiser starts with the current replacement cost new of the property being appraised and then deducts for the loss in value caused by physical deterioration, functional obsolescence, and economic obsolescence.
(American Society of Appraisers)

c) **Market Approach – (Sales Analysis Method)**
The Sales Comparison Approach is used to indicate value by analysing recent sales (or offering prices) of property that is similar (i.e. comparable) to the subject property. If a comparable is not exactly like the properties being appraised, the selling price of the comparable is adjusted to equate it to the characteristics of the property being appraised.
(American Society of Appraisers)

Valuation Method	We have applied both Cost and Market Approach methods for this valuation.
Valuation Methodology	The income approach was rejected as lacking in value. There was sufficient information from both internal and external sources to allow the valuer to arrive at a reliable valuation conclusion.
Special Commentary	The valuer has not sighted any of the machinery or been supplied with any photographs. The valuer has assumed all assets are in good condition at a minimum, fully operational and mine specification as necessary. The valuer has relied on information both written and verbal and has assumed this to be true and correct. The valuer was supplied new pricing on some units and has used that information when conducting the valuation.
Extraordinary Assumptions	The Valuer has assumed that all the assets are in full operational condition, maintained to manufacturer's recommendations, licensed as required and compliant with any necessary regulations.
Hypothetical Conditions	There are no hypothetical conditions applicable to this report.
Recommended Sale Method	In the event that the subject assets would need to be realised, we would recommend that the assets be relocated to a secure Grays sale facility and sold by way of Online Public Auction at www.graysonline.com, in order to maximise exposure and return.
Costs of Sale	We have made no deduction from the valuation for either the cost of disposal or tax liability that may arise on the sale of the assets.

Property Interest-Encumbered Assets	Unless otherwise stated, the subject assets have been valued on the assumption they are wholly owned and free of all encumbrances. Specifically, we have not attempted to identify the assets in this report on the national PPSR register. We recommend that you make enquiries to determine whether in fact this is the case.
Excluded Assets	The following have been excluded from this valuation report: ▪ Items not identified clearly within the Scope of Work; ▪ Personal or third party owned belongings; ▪ Assets stored off site that we were not made aware of; ▪ Domain Names, Patents and Goodwill and all other forms of intellectual property including licenced application software;
Pecuniary Interest and Fee	Grays and its personnel have no present or prospective financial or personal interest in the assets that are the subject of this report and no financial or personal interest with respect to the parties or business entities involved. The engagement of this valuation assignment and the applicable fee are not contingent upon developing or reporting predetermined results.
Assets Valued on Sight Unseen Basis	In some instances, valuation estimates may have been ascribed to assets in this report on a "Sight Unseen" basis due to an inability to sight the assets, or other limiting factors. Please note that valuation estimates ascribed to assets in this report on a "Sight Unseen" basis should be considered indicative only. Grays accepts no liability for reliance placed on assets valued on this basis.
General Limiting Conditions	In addition to the above, please note the following: ▪ We emphasise that the ascribed Forced Liquidation Values assume that the subject assets are included in a traditional on site or online public auction. ▪ Our values do not account for the cost of removal of the assets or any make good requirements. ▪ Our values relate only to the total value of the assets and not to the individual values of separable items. ▪ The valuation is based on the assumption that the assets are, or are capable of, being utilised as assets of a profitable undertaking at the date of the valuation. No allowances have been or could be allowed for future market or global economic changes. ▪ Our valuation is prepared on the basis that a full disclosure of all information and facts which may affect the valuation has been made to us. Grays does not accept any liability or responsibility whatsoever for this valuation unless full disclosure has been made. Accordingly, in all cases we recommend that you should conduct your own investigation and analysis. ▪ The letter and the enclosed valuation have been prepared solely for the purpose of information and analysis by you the Intended User, for your Intended Use as recipient only. Therefore, without any prior written consent, the enclosed valuation or report may not be reproduced, transmitted, included in any document circular or statement or otherwise made available to any person.

CONFIDENTIAL gkahan@yahoo.com IP 101.184.146.45 2025-10-22 03:12 UTC

- The original signed and certified copy of this report should be considered as the only reliable source of information. Soft or electronically transmitted copies may be subject to manipulation outside the control of Grays.
- Grays reserves the right to recall any copies of this report to amend any omission or error.
- Neither the valuer nor Grays purports to be a technical expert on any asset included in this report and our expertise is confined to the valuation practice.
- Any reference to the physical condition of assets as detailed in this report is based on a cursory visual inspection undertaken by the valuer. Unless otherwise stated no mechanical or technical tests have been carried out or relied upon. Values are attributed to assets in this report on the assumption that they are fully operational, free of defects of any nature and comply with all relevant statutory rules and regulations.
- The valuation is given in good faith and has been prepared from sources believed to be reliable at the time. However, subject to qualifications gained in legislation (if any).
- No warranty whatsoever is given in relation to the valuation.
- Grays expressly disclaims all liability for any loss or damage (including economic and consequential loss) suffered by any person acting or relying on the valuation, notwithstanding any act or omission, representation, negligence, default or lack of care by any person.

Limit of Liability

Our liability for any loss or damages incurred by you directly arising from the valuation services is limited to the fee amount paid by you for the valuation Nothing in this clause excludes, restricts or modifies any condition, warranty, right or liability implied in this letter or protected by law to the extent that such exclusion, restriction or motivation would render any provision of these terms and conditions void, illegal or unenforceable.

Annexure A

Market Value

An opinion expressed in terms of money, at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts, as of a specific date.

(American Society of Appraisers)

Orderly Liquidation Value

An opinion of the gross amount, expressed in terms of money, that typically could be realized from a liquidation sale, given a reasonable period of time (typically 90 days) to find a purchaser/purchasers, with the seller being compelled to sell on an as-is, where-is basis, as of a specific date.

(American Society of Appraisers)
